

# MODEL 26

**SAFER FOR YOUR EMPLOYEES AND YOUR BOTTOM LINE.** A benchtop parts washer for use on workbenches around the shop or with the optional roll-around cart. This model can also be used for brake cleaning. Aqueous brake cleaning is recommended by the EPA because, unlike many aerosol sprays, it is less toxic, non-flammable and contains little or no volatile organic compounds (VOCs). Depending on usage, brake cleaning costs can be reduced by as much as 70% when you stop using aerosols. In addition, the brake cleaner can be used to facilitate compliance with the OSHA 29 CRF 1910.1001 asbestos standard.
